

Ejecutar sentencia básica de programación en lenguaje Swift

```
facultaddecontaduriayadministracion — lldb --repl=-Xllvm -aarch64-use...
[facultaddecontaduriayadministracion@MacBook-20 ~ % ls
Desktop          Fundamwntos      Pictures
Documents        Library          Public
Downloads        Movies           hello.swift.save
Fundamentos      Music            ruby_marco
[facultaddecontaduriayadministracion@MacBook-20 ~ % touch hello.swift
[facultaddecontaduriayadministracion@MacBook-20 ~ % nano hello.swift
[facultaddecontaduriayadministracion@MacBook-20 ~ % swiftc hello.swift
[facultaddecontaduriayadministracion@MacBook-20 ~ % ls
Desktop          Library          hello
Documents        Movies           hello.swift
Downloads        Music            hello.swift.save
Fundamentos      Pictures         ruby_marco
Fundamwntos      Public
[facultaddecontaduriayadministracion@MacBook-20 ~ % ./hello
Hello Santiago Escobar
[facultaddecontaduriayadministracion@MacBook-20 ~ % swift repl
Welcome to Apple Swift version 5.9 (swiftlang-5.9.0.128.108 clang-1500.0.40.1).
Type :help for assistance.
[ 1> print("Hello Santiago Escobar")
Hello Santiago Escobar
2> █
```
